

1. Hướng dẫn cài đặt trên Windows

1.1. Cài đặt môi trường:

- Cài đặt Docker Desktop:
<https://docs.docker.com/desktop/setup/install/windows-install/>
- Cài đặt Java 17
<https://www.oracle.com/java/technologies/javase/jdk17-archive-downloads.html>
- Cài đặt NVM Windows (nodejs)
<https://github.com/coreybutler/nvm-windows/releases/tag/1.2.2>
- Cài đặt python 3
<https://www.python.org/downloads/windows/>
- Cài đặt gradle (java)
<https://gradle.org/releases/> (version 7.6.4)
- Cài đặt Git windows
<https://git-scm.com/install/windows>

1.2. Lấy source code:

git clone https://github.com/hoangl/CH_HTTP_2025.1/tree/main/e-commerce-microservices

1.3. Đóng gói docker

- cart-service:

```
cd cart-service  
gradle clean  
gradle build  
docker build -t cart:latest .
```

- products-service:

```
cd products-service  
docker build -t products:latest .
```

- search-service:

```
cd search-service  
docker build -t search:latest .
```

- users-service:

```
cd users-service  
docker build -t users:latest .
```

- store-ui:

```
cd store-ui  
docker build -t store-ui:latest .
```

1.4. Triển khai lên K8s

- Cài đặt các các phân hệ lưu trữ dữ liệu như PostgreSQL, MongoDB, ElasticSearch, Redis

```
cd infra\k8s  
kubectl apply -k shared-services/overlays/local  
kubectl get service -n shared-services
```

- Cài đặt các service của ứng dụng:

```
cd infra\k8s  
kubectl apply -k apps/overlays/local  
kubectl get service -n e-commerce  
kubectl get deploy -A  
kubectl get pod -A
```

1.5. Truy cập vào trang ứng dụng

<http://localhost:30310/>
